Fire & Gas - Power Solutions - Instrumentation & Control - Intelligent Solutions

# About Us

Established since 1974, TELETRON is very proud to have grown from a single man operation to a mid-size organization.

We are a professional Engineering company that has the capability to design, install and commission any system we deal with. Built on an outstanding reputation, TELETRON understands that excellence is built over time and longevity. We are proud to be leaders in our respective fields, determined and committed to growth and excellence which we plan to take into the next decades.

TELETRON constitutes of outstanding management and dedicated professionals, all providing high quality services with proven performance. In the last 38 years, the company actively implemented major projects beyond just the U.A.E market. We have contributed extensively to the development and growth of the region in our engineered solutions offerings.

The most important aspect were we pride ourselves on is that WE DELIVER !

We offer total solutions to various Industries including Telecoms, Oil & Gas, Utilities and Commercial & Industrial Sectors.

Organizationally, TELETRON is divided into five Departments; each department focusing on a wide range of products for a particular market. Our core strategy is to offer quality products in the area of Fire & Gas, Instrumentation & Process Control, Intelligent Solutions, Power Electronics and Telecommunications.

Using factored equipment, the company has established project management and implementation capabilities thus offering solutions for turnkey projects.

For every project undertaken, TELETRON appoints a Project Manager and a team of engineers and technicians that assure best performance and successful completion

TELETRON has a long and strategic partnership with world-renowned Companies in North America and Europe.
