About Us

Established since 1974, TELETRON is very proud to have grown from a single man operation to a mid-size organization.

We are a professional Engineering company that has the capability to design, install and commission any system we deal with. Built on an outstanding reputation, TELETRON understands that excellence is built over time and longevity. We are proud to be leaders in our respective fields, determined and committed to growth and excellence which we plan to take into the next decades.

TELETRON constitutes of outstanding management and dedicated professionals, all providing high quality services with proven performance. Over the years, the company actively implemented major projects beyond just the U.A.E market. We have contributed extensively to the development and growth of the region in our engineered solutions offerings.

The most important aspect where we pride ourselves on is that WE DELIVER !

We offer total solutions to various Industries including Telecoms, Oil & Gas, Utilities and Commercial & Industrial Sectors.

Organizationally, TELETRON is divided into multiple Departments; each department focusing on a wide range of products for a particular market. Our core strategy is to offer quality products in the area of Fire & Security, Instrumentation & Process Control, Intelligent Solutions, Renewable Power Solutions and Telecommunications.

Using factored equipment, the company has established project management and implementation capabilities thus offering solutions for turnkey projects.

For every project undertaken, TELETRON appoints a Project Manager and a team of engineers and technicians that assure best performance and successful completion

TELETRON has a long and strategic partnership with world-renowned Companies in North America and Europe.

Since 1974

Fire & Security

Fire & Security Division Capabilities

With an outstanding reputation in Fire & Gas detection and suppression, we are pleased to being one of the best in engineering, design, support, supply, installation testing and commissioning. Our Fire & Gas specialists understand safe and hazardous area applications and can design and engineer systems as per your HAZOP and technical requirements.

Telectron is proud to have the capabilities to custom build its own panels which carry 3rd party approvals; the ability to conduct FAT's at a local facility and to provide integrated solutions as well as the ability to interface to 3rd party systems such as a BMS / DCS /SCADA's and others.

Telectron's experience in various applications sits above the rest in the industry. We understand that no two applications are the same; We're here to help you !

Renewable Power Solutions Division Capabilities

In-house capability to provide complete solutions to your standby power needs with our strength in System engineering and integration.

Our core competence is to understand your standby power requirement and to deliver a reliable system promptly. Our turnkey solution oriented team of Sales, Marketing and Project execution Engineers, is to ensure customer's satisfaction. The Average experience of our team is about 15 years which sets us as a well experienced and technically knowledgeable organization.

We offer on site assistance as well as 24 hour on-call maintenance and trouble shooting services for existing systems installed by ourselves. Teletron also carries a well established facility for charging and load testing of the batteries, chargers, solar & UPS systems at our facility in the UAE.

Instrumentation

Instrumentation & Control Division Capabilities

The Instrumentation & Control Division of Telecton provides customers the latest innovation in Instrumentation, Industrial Networking systems, and safety components in control systems as well as control sensors. Our strength lies in recommending and procuring the right product for the right application.

With over 3 decades of experience Telecton would be delighted to address your Instrumentation and Control requirements. Our experts are ready to meet with you, understand your needs and address them accordingly.

ELV Solutions - Division Capabilities

Our Intelligent Solutions department undertakes the most complex low voltage and telecommunication systems in the industry to ensure a better quality of living, through advanced communication and technology. Under a building management system supplied by a third party; we are delighted to bring the best of global technologies to our customer's table to be able to optimize their use of time.

With a very demanding time schedule we understand that people have to take advantage and utilize technology to optimize their use of time during the day. Our systems help people on a daily basis to achieve that.

From hospitals, to atriums, religious institutions, stadiums, classrooms, homes, commercial and residential buildings; our solutions are fit for use right across the board. It is Telectron's responsibility to ensure the right solution is used for the right application and undertakes the responsibility to ensure that the systems work properly.

TELECOM Division Capabilities

Telectron is a leading provider of networking and telecommunications solutions for businesses of all sizes. The company offers a comprehensive range of services, including network design, installation, maintenance, and support, as well as voice and data solutions, unified communications, and cloud-based services. With over 49 years of experience in the industry, Telectron has built a reputation for delivering reliable, secure, and scalable solutions that help businesses improve productivity and efficiency.

Products and Services:

- **Network design, installation, and maintenance**
- **Voice and data solutions**
- **Unified communications**
- **Cloud-based services**
- **Network security solutions**
- **Wireless networking**
- **Network performance optimization**
- **Network monitoring and management**
- **Video conferencing and collaboration tools**
- **Internet of Things (IoT) solutions**
- **RF Booster Devices**

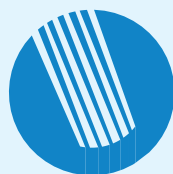

Competitive Advantage:

Telectron differentiates itself from competitors by offering customized solutions that are tailored to each client's specific needs. The company's team of experienced engineers and technicians work closely with clients to understand their unique requirements and develop solutions that are both cost-effective and efficient. Telectron also places a strong emphasis on network security, offering a range of solutions to protect against cyber threats and ensure the confidentiality and integrity of client data.
